

SUNVIC

comfort in control

The motorised valve is probably the hardest working component in 'wet' domestic central heating systems, so you need to be sure it comes from a name you can trust.

SUNVIC motorised valves are guaranteed to be of high quality, high reliability and high specification. Years of experience in the mastery of valve design and manufacture gives uniqueness to the products within our range.

2-Port S/R Valve

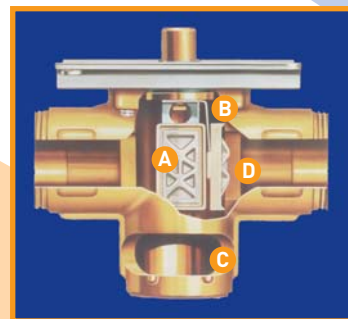

- Spring return action
- Manual lever for filling/draining system
- Actuator replaceable without draining down system
- Self-cleaning shoe action
- Auxiliary switch for electrical control of pump boilers and other ancillaries
- Available as complete valves or separate body and actuator
- Normally closed and normally open actuators available
- Valve OPEN neon actuators available
- Maximum flow temperature of 93°C

3-Port S/R Valve

- Spring return action
- Manual lever for filling/draining system
- Actuator for mid position or diverter applications
- Actuator replaceable without draining down system
- Revolutionary patented 'Slipseal' action
- Self-cleaning shoe action
- Maximum flow temperature of 93°C

- A** Self-cleaning rubber seal ensures good shut-off
- B** Driven by stainless steel leaf spring and no bulky spindle to reduce flow and cause turbulence
- C** Clear unimpeded water flow and no ball or paddle
- D** Unique patented ramp feature moves rubber seal away from valve chamber wall to allow self-cleaning
